DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-2 and 33-34 are allowable over the prior art of record because the prior art of record fails to teach or fairly suggest connecting to a data repository of the database the data repository including a plurality of memory-mapped file segments stored on at least one nonvolatile memory medium, wherein the database is not stored in a main memory of a computer connecting to the data repository, the file segments including objects directly interconnected by memory pointers, and mapping the found file segment into the main memory; as detailed in independent claims 1 and similarly to claim 33.

Claims 3-5, 7-31, and 35-36 allowable over the prior art of record because the prior art of record fails to teach or fairly suggest connecting to a data repository of the database the data repository including a plurality of memory-mapped file segments stored on at least one nonvolatile memory medium, wherein the database is not stored in a main memory of a computer connecting to the data repository, and mapping the found file segment into the main memory, wherein file segments in the data repository are not copied into the main memory from the data repository when needed by the application program and are instead read, updated, deleted, or modified directly in the data depository by the application program, as detailed in claim 3 and similarly to claims 30 and 35.

The prior art of record, Baulier (US Patent 6,496,831 B1) and Horan (US Publication 2003/0225662 A1), fails to teach connecting to a the file segments in a data repository, wherein the database is not stored in the main memory of the computer, and mapping the file segments to the main memory of the connecting computer, the file segments not written into the main memory but are instead accessed directly by the connecting computer. After careful consideration of the Brief (pages 13-18) filed 1/24/2007 and the personal interview conducted 3/9/2007, the applicant extensively and specifically pointed out how the claim amendments overcome the prior art of record. Consequently, the claims as amended are allowable over prior art.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
